

Dear Road Tube Simulator Owner,

Thank you for your purchase!

In your package you should have the Road Tube Simulator itself, 8 rubber tubes for connecting the output nozzles on the Road Tube Simulator to your counters, and 1 DC power adapter for powering the device.

Our website will always have the latest available information on it. Including the latest software, manuals, drivers, and warranty information. You can find links to anything related to the Road Tube Simulator at the bottom of it's web page. All links listed below are available from this page: **<http://www.VehicleCounts.com/road-tube-simulator>**

Our TrafficViewer Pro software can be used to update your Road Tube Simulator firmware when new versions are available. The latest version of our TrafficViewer Pro software is always available on our website, and is free of charge. URL: **<http://TrafficViewerPro.VehicleCounts.com>**

If you do want to connect your Road Tube Simulator to your computer to update it's firmware you will need a standard USB cable (which is generally very common to have around, so we do not ship one with the unit) and you will likely also need to install drivers for the device. These drivers can be found on our website's "Downloads" page with the name "Download Adapter/Cable USB Driver". URL: **<http://www.VehicleCounts.com/all-downloads>**

You will also find a manual for the Road Tube Simulator on our website, which you can either use online, or print a copy of the PDF if you prefer. Links to the manuals are available from the Road Tube Simulator web page.

WARRANTY SUMMARY: As an owner of our Road Tube Simulator you have a 2 year warranty on your unit from the date of shipment. This covers anything that may go wrong with your unit under normal use but does not cover abuse (dropping or other damage incurred on the device). See our website for complete details. URL: **http://www.VehicleCounts.com/warranties_and_repairs#RTS8_warranty**

We thank you for your purchase of our Road Tube Simulator and hope to again do business with you in the future!

If you have any problems, questions, or other feedback, please don't hesitate to contact us.
